# Brickstuff Color-Changing Spotlight Troubleshooting Guide

Using a magnifying glass, look closely at the small, round circuit board with the square LED light on it. You should see a black rectangle with the number "750" or "270" on it, as shown by the red circle.

If you see a "241" instead of either a "750" or "270", let us know by sending an e-mail to support@brickstuff.com and we will send you replacements. When you e-mail us, let us know how many spotlights you have with the "241" value. Thank you!
